# GREETINGS

## *from the City of Tulips*

THERE is a time each year when the Tulip takes command of the clean, thrifty city of Holland. In years past, hundreds of thousands of people have invaded this lakeshore community to drink in the beauties of spring-time's most welcome flower, and Holland has provided a daily round of festivities to entertain its guests.

But all the picturesque and entertaining festivities have been put aside for the duration, to be resumed again when victory is ours.

Meanwhile, the Nelis Nurseries, who have always played a quiet but important part in this annual Tulip Festival, will do their utmost to keep alive the culture of Tulips, which their forefathers began centuries ago. In its extensiveness of varieties and gorgeousness of color, the Nelis Tulip Farm is undoubtedly the most colorful mass display of Tulips to be seen anywhere in the world. We have planted as many Tulips as in past years, and our display will be open to the public for those that are able to come to enjoy the beauty of "Tulip Time."

## *Nelis Famous* DUTCH RAINBOW *Collection*

This is the finest, most colorful mixture of Darwin, Breeder, Cottage and Lily-Flowered Tulips, in a color range that includes every color, shade and blending. Ideal for beds and cutting. Due to a near crop failure last year we are offering for 1944 only blooming size bulbs.

Dear Customer:

We take great pleasure in presenting to you our catalog for 1944.

Due to most unfavorable growing weather in 1943, our supply of bulbs has not materially increased, but we consider ourselves very fortunate, because the industry as a whole has suffered severe losses during the past year, mainly due to inclement weather conditions.

Notwithstanding the difficulties of the past, you will find a choice list of a great assortment of Tulips and other bulbs, and where some older varieties have been eliminated, others have come to take their place. Also our listing of Daffodils (Narcissi) has been maintained, and increased in the new varieties.

As in the past two years, we continue to recommend deep planting for Tulip bulbs, and for those who are skeptical, trial plantings are advised. During the past year we received word from a few who reported this system had not proved satisfactory, but many others were very enthusiastic about their results. It is doubtful if any method can be found which would be foolproof for all soils and every section of the country. We are continuing our own experiments, and extending our trials to the deep planting of Narcissus or Daffodils, for here too, bulbs have multiplied too rapidly in shallow planting, resulting in too much foliage and few flowers. We wish to mention again that deep planting is not advised where bulb increase is desired, but rather for annual bloom over a longer period of years without replanting. We would be very pleased to hear of your results.

We wish to thank our customers for their past patronage, and ask their indulgence, for at times we have a severe shortage of experienced help, and other difficulties with which you are all so familiar. However, we will continue to serve you to the best of our ability.

Yours very truly,  
NELIS NURSERIES, INC.

# Nelis Giant May-

The modern Giant May-Flowering Tulip is the result of three separate experiments of Tulip breeding, formerly classified as Darwin, Cottage and Breeder Tulips. Through the inter-breeding of the three before-mentioned classes, the terms Darwin, Cottage (or Hybrid) and Breeder Tulips still listed in some catalogs have become so confusing that even among the best informed there are many clashes of opinion. Since the modern Giant May-Flowering Tulips contain the blood of all the three preceding crosses in proportions unknown to even the plant breeders themselves, it seems useless to maintain this class distinction any longer, as they are both scientifically and practically absolutely meaningless. We, therefore, will list them from now on as Giant May-Flowering Tulips. The term May-Flowering is based on our Michigan climate, and in southern locations the blooming period will, of course, be earlier. In revising our list for 1944 we have eliminated many varieties, which we have considered to be surpassed by later introductions.

## Mixed Rembrandt TULIPS

Rembrandt Tulips are striped and feathered Darwin Tulips, with stripes or flakes of white, lavender, red, yellow, or other colors as their colors. They blend in perfect harmony at all times. We offer them in a mixture only. They are especially nice when used for cut flowers. **\$1.75 per doz.**

# BOTANICAL TULIPS

These wild Tulips come in lovely odd shapes, many with reflexed petals and curiously twisted and reflexed foliage. They belong in the rock garden where they thrive and increase if left in the ground from year to year. Plant them in groups of six to twelve bulbs among the rocks in fairly well drained pockets. We have eliminated all varieties of inferior and poor blooming qualities and only those varieties that have given satisfaction under American conditions have been listed.

**CAMPERNELLE, DOUBLE.** (Jonquil.) Ideal for cutting, for this variety has strong stems that bear from two to three small, fragrant flowers of golden yellow. About 13 inches tall. 45c per 3; \$1.35 per doz.; \$10.00 per 100.

In order to have a beautiful bulb garden, Narcissi should be planted freely. They thrive in practically any climate in the United States, and are not only excellent for outdoors, but millions are used every year for forcing indoors. Their graceful form, beautifully shaped trumpets and cups, and the long, straight stems have made them favorites for cut flower purposes with every American gardener. We have added many new varieties to the old favorites. For a real revelation you should try some of the new types. They are really exquisite.

That you may understand the different types coming under the Daffodil classification, the explanation below should be read.

The term Trumpet Daffodil means that the trumpet is as long or longer than the perianth segments, regardless whether the color is lemon, yellow or white.

The term Incomparabilis means that the cup or crown measures from one-third to nearly the length of the perianth segments.

The term Leedsii means that the perianth is white, the cup is short, either white, citron, or sometimes pink or apricot.

The term Barri means that the cup or crown measures less than one-third the length of the perianth segments.

The term Jonquil means that the foliage is very long and narrow, or round; in other words, rushlike. The flowers buttercup-yellow, small, but very fragrant.

The term Poetaz means the bunch-flowering type, producing from six to twelve flowers per stem, and in all cases deliciously fragrant.

**CAMPERNELLE, SINGLE.** (Jonquil.) A tiny, fragrant Daffodil of golden yellow, with tips of pointed, grasslike foliage reaching above the flower. A delightful blossom with overlapping broad petals making a nicely rounded perianth; frequently blooms three to a stalk. 40c per 3; \$1.15 per doz.; \$8.00 per 100.

**CARLTON.** (Incomparabilis.) A beautiful variety that is destined to become very popular when more widely known. Broad, overlapping flat perianth, with a large expanded cup frilled at brim, the entire flower of a uniformly soft yellow. A magnificent plant of great vigor, very free-flowering, early, of long-lasting quality, excellent for exhibition. This variety received an Award of Merit. \$2.00 per 3; \$6.75 per doz.; \$50.00 per 100.

**CASSANDRA.** (Poeticus.) Perianth white, cup canary-yellow, rimmed bright red; one of the newer Poeticus varieties. Award of Merit. 35c per 3; \$1.15 per doz.; \$8.00 per 100.

**CHEERFULNESS.** (Double Poetaz.) A double form of the famous cluster-flowering Daffodil. Received an Award of Merit; splendid for the garden, late blooming, very fragrant. Frequently called the "Gardenia Daffodil." 50c per 3; \$1.65 per doz.; \$12.00 per 100.

**CROESUS.** (Incomparabilis.) Perianth light canary-yellow, opening flat, with broad, fluted cup of rich orange to base; free flowering and desirable in every way. Received a First Class Certificate as well as an Award of Merit. 50c per 3; \$1.60 per doz.; \$11.50 per 100.

**CROWNED BEAUTY.** (Barri.) A novelty Narcissus, with a golden yellow perianth, the long petals producing a starlike effect. The deeply frilled cup of dark orange blends to a golden yellow at the throat. A large, open and airy flower. \$1.80 per 3; \$6.00 per doz.

# or Daffodils

**DAISY SCHAEFFER.** One of the best of the remarkable new Giant Leeds type; the flower 4½ inches across, with cup nearly 2 inches. Resembles a Giant Trumpet, but much more graceful in form; perianth pure white, with cup opening primrose and turning to light canary-yellow, deeper at the base. Long, lemon-yellow stigma and styles add to the color harmony of this remarkable flower, which has captured an Award of Merit, and several First Class Certificates. **\$5.00 each.**

**DICK WELLBAND.** An exhibition variety of great excellence, this variety stands out even in the largest collection of Daffodils. The perianth is pure white, and the cup a brilliant flame-orange, and the startling contrast between petals and cup makes this variety a great beauty. The color does not fade, but rather intensifies with age, and the flower has unusual lasting qualities. Highly recommended. **\$2.75 per 3; \$10.00 per doz.**

**FIRETAIL.** (Barri.) A new variety of importance, broad-petaled, creamy white perianth, and large orange cup with scarlet-orange frill. Received an Award of Merit, and First Class Certificate. **75c per 3; \$2.50 per doz.; \$19.00 per 100.**

**FLAME.** (Barri.) Bright yellow perianth and short, broad cup, conspicuously edged brilliant orange-scarlet. Very lovely variety. **45c per 3; \$1.50 per doz.; \$11.00 per 100.**

**FRANCISCA DRAKE.** (Incomparabilis.) We cannot adequately describe the beauty of this distinctly new type. The pure white perianth petals are of unusual substance, an inch and a half wide, and tinted gold at the base, which shows through on the outside; the cup, wide and deep, is golden yellow at the base, changing gradually to flame-orange at the densely frilled edge; the flowers are held well above the fine foliage, giving the effect of white seagulls taking flight. Strong growing and very free-flowering; received an Award of Merit. **90c per 3; \$2.90 per doz.; \$21.50 per 100.**

**GLORIOUS.** (Poetaz.) Tall flower, delightfully informal habit, creamy white, round perianth with brilliant orange-scarlet cup. Fine for semi-shade. Received an Award of Merit and First Class Certificate. **\$1.05 per 3; \$3.50 per doz.; \$26.00 per 100.**

**GOLDEN SCEPTER.** (Jonquil Hybrid.) More gracefully proportioned than the Giant Trumpets, a medium sized, perfectly built flower of deep jonquil-yellow, three or more inches in diameter, star-shaped perianth, slightly lighter than the trumpet, which is slightly rolled and flared at the edge; long-lasting qualities. Received an Award of Merit and First Class Certificate. **45c per 3; \$1.50 per doz.; \$11.00 per 100.**

**HELIANTHUS.** (Barri.) Soft yellow perianth with a short, wide open cup, and a distinct edge of clear orange-red, extending golden yellow to the throat. The flower is medium in size, but very striking in its unusually fine and brilliant appearance. A real novelty. **\$1.00 per 3; \$3.25 per doz.; \$25.00 per 100.**

**HER GRACE.** (Leeds.) Unusually lovely variety with a silvery white perianth, cup of delicate sulphur-yellow, passing off white, which is deeply frilled at mouth. **\$2.25 per 3; \$7.50 per doz.**

**IMPERATOR.** (Trumpet.) This lovely, graceful Daffodil is considered one of the finest varieties. Perianth and cup purest white. **\$1.35 per 3; \$4.50 per doz.**

Received an Award of Merit. \$1.00 per 3; \$3.25 per doz.; \$24.00 per 100.

**KING ALFRED.** (Yellow Trumpet.) Received a First Class Certificate. An old variety, but still very good. The finest giant all golden yellow Narcissus. Jumbo size bulbs, 75c per 3; \$2.50 per doz.; \$18.00 per 100. First size bulbs, 60c per 3; \$2.00 per doz.; \$15.00 per 100.

**LAURENS KOSTER.** (Poetaz.) White perianth with delicate lemon colored cup. A splendid variety; good for forcing. 50c per 3; \$1.60 per doz.; \$11.50 per 100.

**LORD WELLINGTON.** (Yellow Trumpet.) This glorious Daffodil is the best of the all-yellow Trumpets ever offered. This exquisite novelty should be included in every collection. \$1.80 per 3; \$6.00 per doz.

**LOVENEST.** (Trumpet.) One of the very few members of the "Pink Daffodil" class; among the daintiest of all the trumpets; medium in height with a star-shaped perianth of informal type; nicely proportioned trumpet of saffron-yellow, turning to apricot-pink; delightfully charming at all stages; very early. Received an Award of Merit. \$1.10 per 3; \$3.75 per doz.

**LUCINIUS.** (Incomparabilis.) An outstanding flower of unusually good form and excellent substance, of purest self-colored golden yellow. Received an Award of Merit. We recommend this variety very highly. 50c per 3; \$1.65 per doz.; \$12.00 per 100.

**MARY COPELAND.** (Double.) A beautiful novelty of the new semi-double type, and termed the most striking new double. The longer petals are pure creamy white with a golden ray down the center, interspersed with shorter petals of lemon and brilliant orange, giving a three-color effect. Received a First Class Certificate. \$2.00 per 3; \$6.50 per doz.; \$45.00 per 100.

**MAYFLOWER.** (Poeticus.) The finest of this class we have yet seen. A new novelty with a pure white perianth of exquisite form, the short cup edged fiery red, changing to orange at center. Received an Award of Merit as a show flower. \$1.60 per 3; \$5.75 per doz.

English Iris

# English IRIS

This magnificent mixture of bulbous English Iris has been developed at our nurseries, and contains all the choicest varieties which can possibly be had in these fine Iris. The English Iris are a bulbous Iris which bloom in our latitude about the early part of July, and come after all other bulbous Iris. They should be planted as soon after the beginning of September as possible for best results. They prefer the more moist and heavier soils, and should have good drainage. The blooms of the English Iris are considered to be the finest of any in the Iris class, and each individual bloom is strikingly beautiful, and as cut flowers they are unsurpassed. We are offering them in a fine mixture of colors.

# Autumn Flowering IRIS

Flowering Two or More Times Each Season

We take great pleasure in offering a list of the finest fall bloomers in cultivation. While best results are secured with these Iris below the Mason-Dixon Line, with a little care we have obtained excellent fall bloom in Michigan. Some of the varieties listed not only bloom profusely early in spring, but under favorable conditions also produce crop after crop of flowers for more than 100 days in late summer and fall. There are as yet but comparatively few of these flowers in existence, and the demand has been so great that we, as well as the few other growers who have stocks of fall bloomers, could fill only a small portion of the orders received last year. Please order early. Shipment will be made starting July 15th.

## DEEP PLANTING METHOD FOR TULIPS

During the past several years we have conducted several tests on our nurseries in Holland, Mich., using different planting methods for Tulips, in order to discover which is the most satisfactory.

You Tulip lovers who balk at the thought of digging up and replanting your Tulips every year or two, will be glad to know that from the results of these tests we have found conclusively that the deep method of planting is far superior to any other. And by using this method, your Tulip planting is more permanent!

When you plant your Tulips shallow the bulbs have a tendency to split up into several divisions, usually too small to produce bloom. This method is fine when used by growers for propagation purposes, but Mr. Average Gardener wants flowers! Therefore, plant deeper.

By planting deep, we mean 9 to 10 inches in heavy soil, providing there is proper drainage, or 12 to 14 inches deep in lighter soil. The bulbs do not split so readily, and remain of blooming size much longer. Also, if you've had your plantings ruined by inroads of mice and moles, another difficulty has been overcome, because they seldom work at that depth, and the bulbs are beyond their reach.

As deep planting is still in the experimental stage, the latest developments will be included with your order of bulbs. Look for it. Trials are now being conducted with Daffodils as well as Tulips.

The booklet "The Tulip—its Culture and Care," written by Mr. Harry Nelis, is available to our customers at 10 cents each.

## IRIS RETICULATA

This lovely species is one of the treasures of the garden or rock garden. It can be described as a small form of the Dutch or Spanish Iris. Its main value lies in the fact that it can be forced into bloom in the house with the greatest ease. Six or eight bulbs put into a 4- to 5-inch pot when received will bloom about Christmas time. The fragrant blossoms remind one of a bunch of fresh violets. Perfectly hardy with reasonable protection. It is one of the loveliest early flowering bulbs for the rockery.
